EXPERIENCE

Codesplice Ltd

Aug. 2024 – Present

Senior .NET Developer

Remote

- Developed scalable backend microservices using AWS Lambda and .NET for CRM and Quality Management platforms
- Built and optimized REST API integrated with MySQL RDS for complex business workflows and inventory operations
- Developed CI/CD deployment pipelines using YAML and AWS services for multi-environment releases
- Implemented logging and monitoring using AWS CloudWatch for production issue tracking.
- Optimized MySQL stored procedures and allocation workflows for inventory and stock management systems
- Collaborated with QA and frontend teams to deliver stable releases in agile environments.
- Leveraged AI-assisted development workflows using GitHub Copilot and LLM tools for debugging, backend development, and faster issue resolution

Celebal Technologies Pvt Ltd

February 2022 – August 2024

Application Modernization Engineer

Jaipur, Rajasthan

- Worked on enterprise cloud modernization and backend development projects using .NET Core, Azure, and serverless technologies.
- Migrated legacy .NET Framework applications to .NET Core/.NET 7.
- Developed APIs and integrations using ASP.NET Core, Azure Functions, and Azure API Management.
- Built and managed CI/CD pipelines using Azure DevOps and YAML workflows.
- Worked with Azure services including API Management, Logic Apps, App Services, Blob Storage, Virtual Networks, and Application Insights.
- Contributed to migration of Java/Spring Boot services into .NET Core and NestJS-based backend solutions.
- Participated in architecture discussions, sprint planning, client communication, and pre-sales activities.
- Led backend development activities including task planning, code reviews, and technical guidance.

SKILLS

Programming: C#, TypeScript / JavaScript, SQL

Backend Development: .NET Core, ASP.NET Core Web API, Entity Framework Core, REST APIs, JWT Authentication, Microservices

Cloud – Azure: Azure Functions, Azure API Management (APIM), Azure DevOps, Logic Apps, App Services, Blob Storage, Application Insights

Cloud – AWS: AWS Lambda, API Gateway, EC2, RDS, CloudWatch

DevOps & CI/CD: YAML Pipelines, Azure DevOps, GitHub, Bitbucket, CI/CD Automation

Database: MySQL, MSSQL, Stored Procedures, Query Optimization, Redis Cache

Architecture & Practices: Serverless Applications, API Design, Agile/Scrum, Technical Estimation, Sprint Planning

AI & Automation: GitHub Copilot, ChatGPT, Claude, Codex, Gemini, AI-assisted debugging and development workflows

Tools: Swagger/OpenAPI, Postman, Jira, xUnit

EDUCATION

Swami Keshwanand Institute of Technology (SKIT)

Aug. 2016 – Nov. 2020

Bachelor of Technology in Information Technology

Jaipur, Rajasthan
